

# APM Terminals Mombasa

## Inland Container Depot

### APM Terminals' Great Lakes Port provides customers with a competitive advantage.

The new ICD is the most innovative in Mombasa and its efficiencies can save your business at least \$370 port charges. It features a competitive rail link connecting Nairobi and neighbouring countries to provide a one stop opportunity for your business.

Located 4 kilometres from the Port of Mombasa, Great Lakes is spread over 7.5 hectares of land and positioned between the Mombasa-Nairobi Highway and Jomvu Road.

A fast rail link connects the port to the container freight station (CFS) within 48 hours and is under APM Terminals control from ship to the CFS. Direct rail links to Nairobi and beyond save premium transport and weighbridge charges and offer an environmentally friendly alternative to increasingly congested road links.

The container depot boasts reliable equipment and trained operators to ensure expert and efficient handling of your containers.
